Phosphorus	Min.	0.6 %	
Sodium	Min.	0.2 %	Max. 0.5 %
Copper	Min.	70 PPM	
Selenium	Min.	0.3 PPM	
Zinc	Min.	220 PPM	
Vitamin A	Min.	8,000 IU/LB	

INGREDIENTS: Recleaned Whole Oats, Rolled Barley, Soy Hulls (Not more than 13%), Dehulled Soybean Meal, Beet Pulp, Cane Molasses, Wheat Middlings, Canola Meal, Soybean Oil, Dried Distillers Grains, Monocalcium Phosphate, Dicalcium Phosphate, Calcium Carbonate, Salt, Manganese Sulfate, Zinc Sulfate, Copper Sulfate, Vitamin E Supplement, Selenium Yeast, Ferrous Sulfate, Niacin, Riboflavin Supplement, Vitamin A Supplement, Calcium Pantothenate, Biotin, Choline Chloride, Sodium Selenite, Thiamine Mononitrate, Vitamin D3 Supplement, Vitamin B-12 Supplement, Folic Acid, Calcium Iodate, Rice Bran, Cobalt Sulfate, Linseed Meal, Magnesium Oxide, Yeast Culture, Dried Whey, Potassium Calcium Magnesium Clinoptilolite (Natural Zeolite), Diatomaceous Earth, Zinc Methionine Complex, Manganese Methionine Complex, Copper Lysine Complex, Cobalt Glucoheptonate, Sulfur, Ascorbic Acid, Propionic Acid (a preservative)

FEEDING DIRECTIONS: Each horse is unique and should be fed to maintain desired body condition and performance. Feeding rates need to be adjusted according to the horse's condition and training or competition schedule. Split the recommended feeding levels into two or more feedings each day.

<u>Life Stage / Activity Level</u>	<u>Lbs Feed per 100lbs Bodyweight</u>
Yearlings and 2-Year-Olds	0.75 to 1.5
Foals (Creep Feed) / Weanlings	1.25 to 1.75

Feed along with a good, clean quality hay or pasture equivalent at the rate of 1 to 1.75 lbs per 100 lbs of bodyweight daily. Make all feeding changes gradually over a two week period. Provide plenty of fresh, clean water at all times except to hot, tired horses. Horses should be cooled out properly before having access to unlimited water or being fed. Horses should have their feeding rate reduced when exercise is reduced. Salt should be available free choice.
