FEEDING DIRECTIONS: Make all feeding changes gradually over a two week period. Feed to maintenance horses at the rate up to 1.0 to 2.0 lbs per 100 lbs of bodyweight per head per day as a fiber supplement. May be used as a replacement for hay. Each horse is unique and should be fed to maintain desired body condition and performance. Split the recommended feeding levels into two or more feedings each day.

IMPORTANT: NOT A COMPLETE FEED. Provide adequate vitamin and mineral supplementation. Provide plenty of fresh, clean water at all times except to hot, tired horses. Horses should be cooled out properly before having access to unlimited water or being fed. Salt should be available free choice.
