

HOOF & HEALTH PROTEIN TUB

A protein, mineral and vitamin supplement that is scientifically formulated especially for the needs of horses. All Futurity Precise products are fortified with organic trace minerals plus Biotin and Methionine. Trace Minerals, Biotin and Methionine are important nutrients in a balanced diet and may contribute to hoof integrity, animal health and forage digestibility.

Feeding and Management

1. Provide 1 tub per 5-10 horses. Start with 1 tub per 5 head of horses and adjust this number to achieve desired intake a minimum of 2 tubs may be necessary to ensure proper accessibility for small groups.
2. Place tubs where animals congregate. Locate throughout pasture, placing them near water and loafing areas. Maintain adequate distance between tubs (10 ft. minimum).
3. Horses should consume 1 to 2 pounds per head daily based on a 1,000 pound animal.
4. Feed tubs continuously. When a tub is nearly depleted, place a new tub nearby.
5. Feed as the only FREE CHOICE source of protein, salt, minerals and vitamins
6. Provide clean, fresh water to all animals at the times.

IMPORTANT

During the first week of use, place the tubs about 50 ft. from water and loafing areas. As horses become acclimated to the presence of the tubs, some repositioning may become necessary to achieve proper consumption. If increased consumption persists for more than two weeks and repositioning of the blocks does not correct the situation, remove the tubs and evaluate overall feeding program.

CAUTION

THIS FEED CONTAINS ADDED LEVELS OF COPPER. DO NOT FEED TO SHEEP.
