

FLOATING CATFISH PELLETS

Feeding Directions

Fish Farm is formulated as a high quality feed and is for fish 6" long or longer. Fish at this size should be fed once a day, six days a week, till they reach grown to harvest size. Broadcasting of the feed should take place at about the same time, from the same location, the feeding rate can be started at the demand level or near 3% body weight. The feeder's own observation as to how the fish are feeding is important. If the fish respond slowly, as they may during certain weather changes, feed only what they will consume during a 12 to 15 minute span. If the fish are feeding actively continue the broadcast of the feed till their appetites have been satisfied and activity stops.

WARNING

Do not feed to cattle or other ruminants

Guaranteed Analysis

CRUDE PROTEIN (Min)	32.0%
CRUDE FAT (Min)	3.0%
CRUDE FIBER (Max)	8.0%
PHOSPHORUS (Min)	0.49%
MOISTURE (Max)	12.0%
